Max the monkey

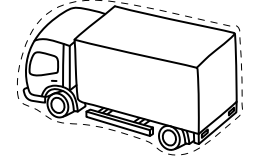

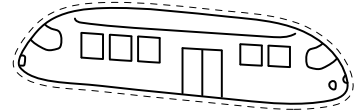

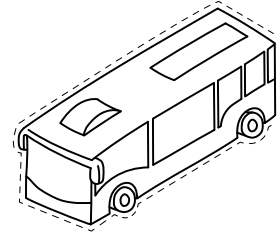

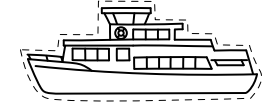

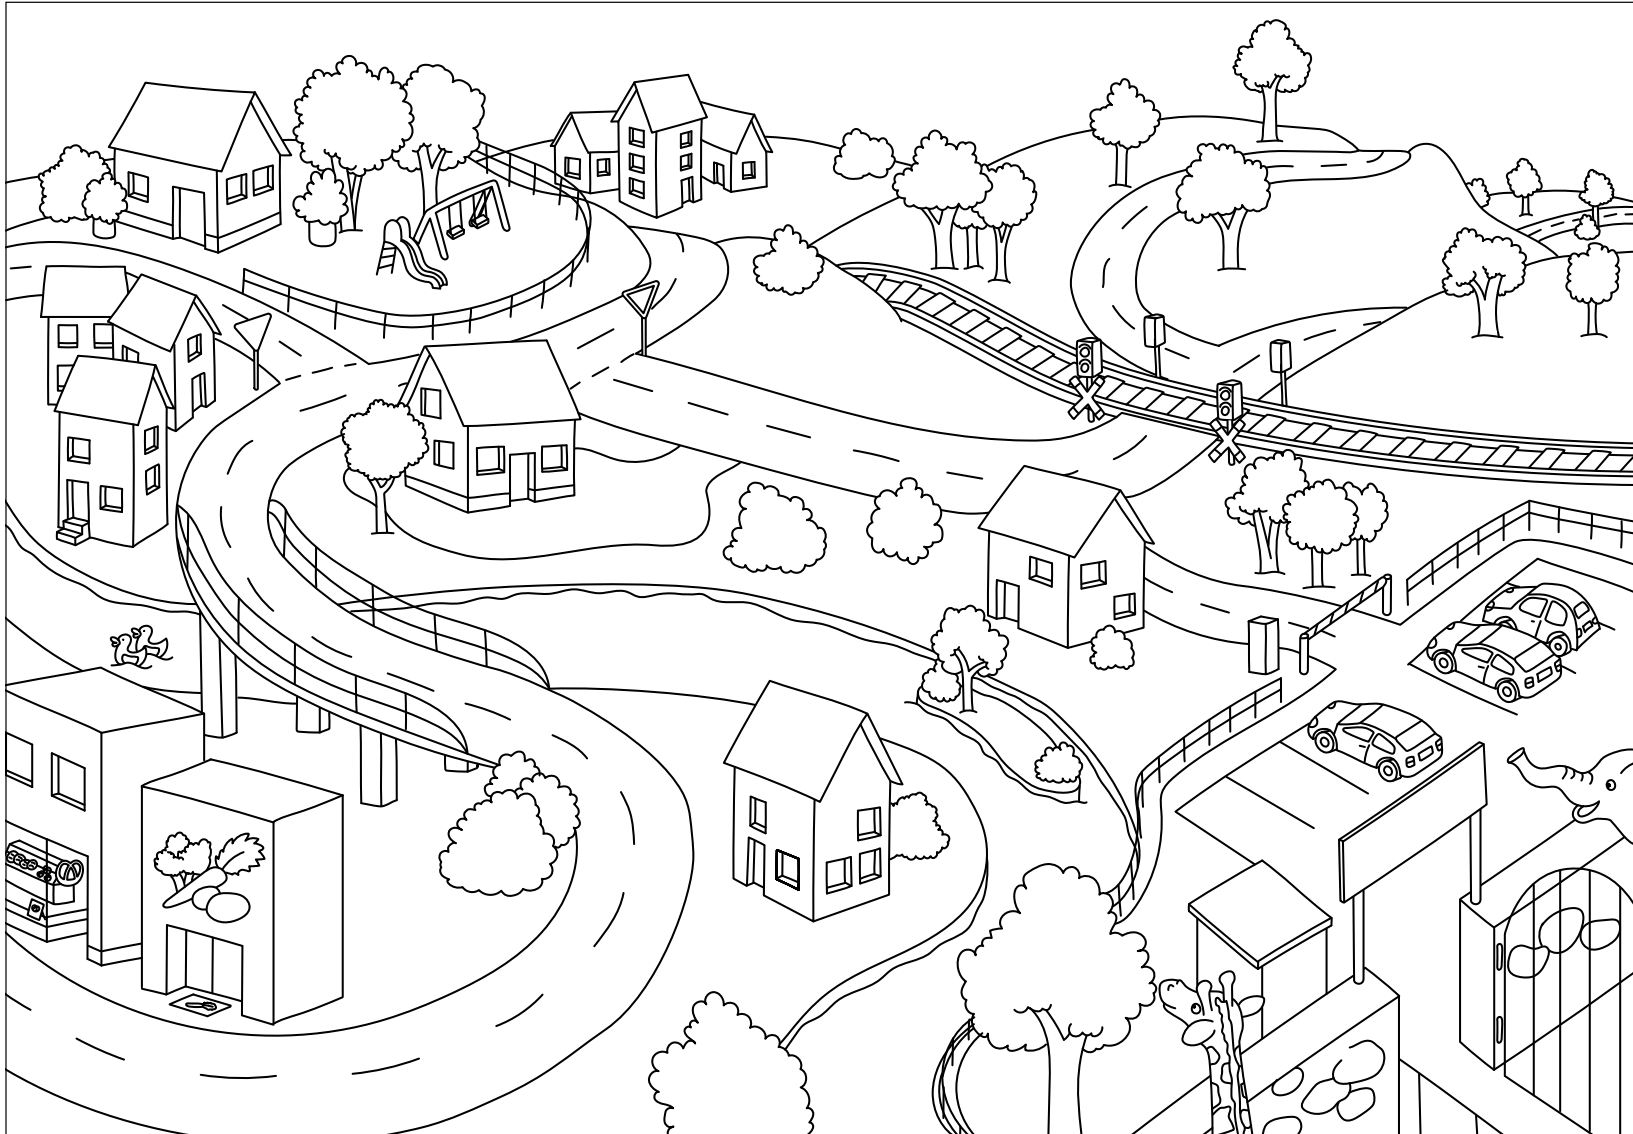

My name is Max. I am a monkey. I live at Central Park Zoo in New York City. I am a zookeeper. A zookeeper feeds the animals and looks after them. My favourite fruit is apples. My favourite drink is veggie smoothie.  
Max, what are you doing?

**Can you answer these questions:**

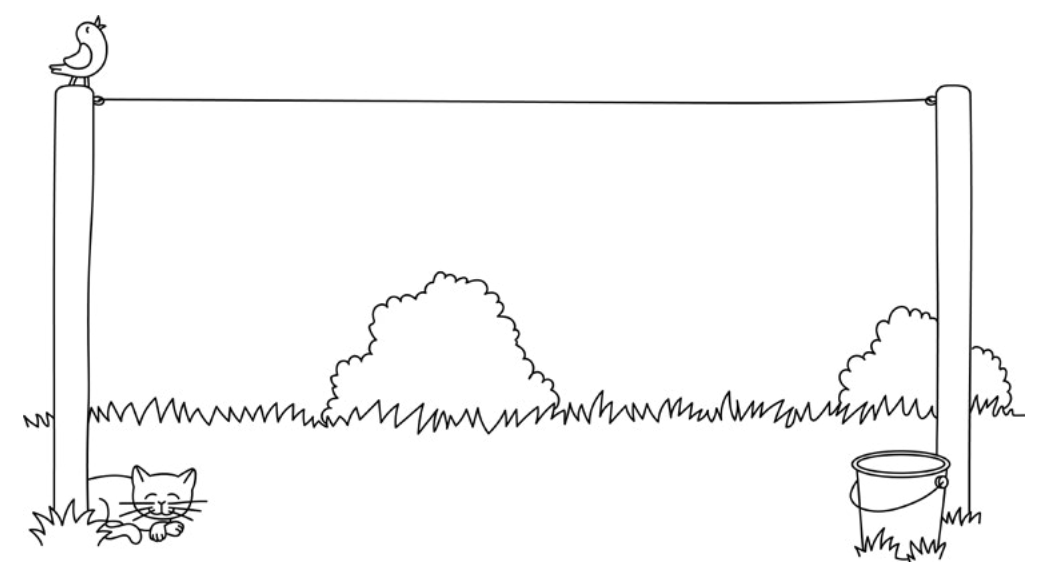

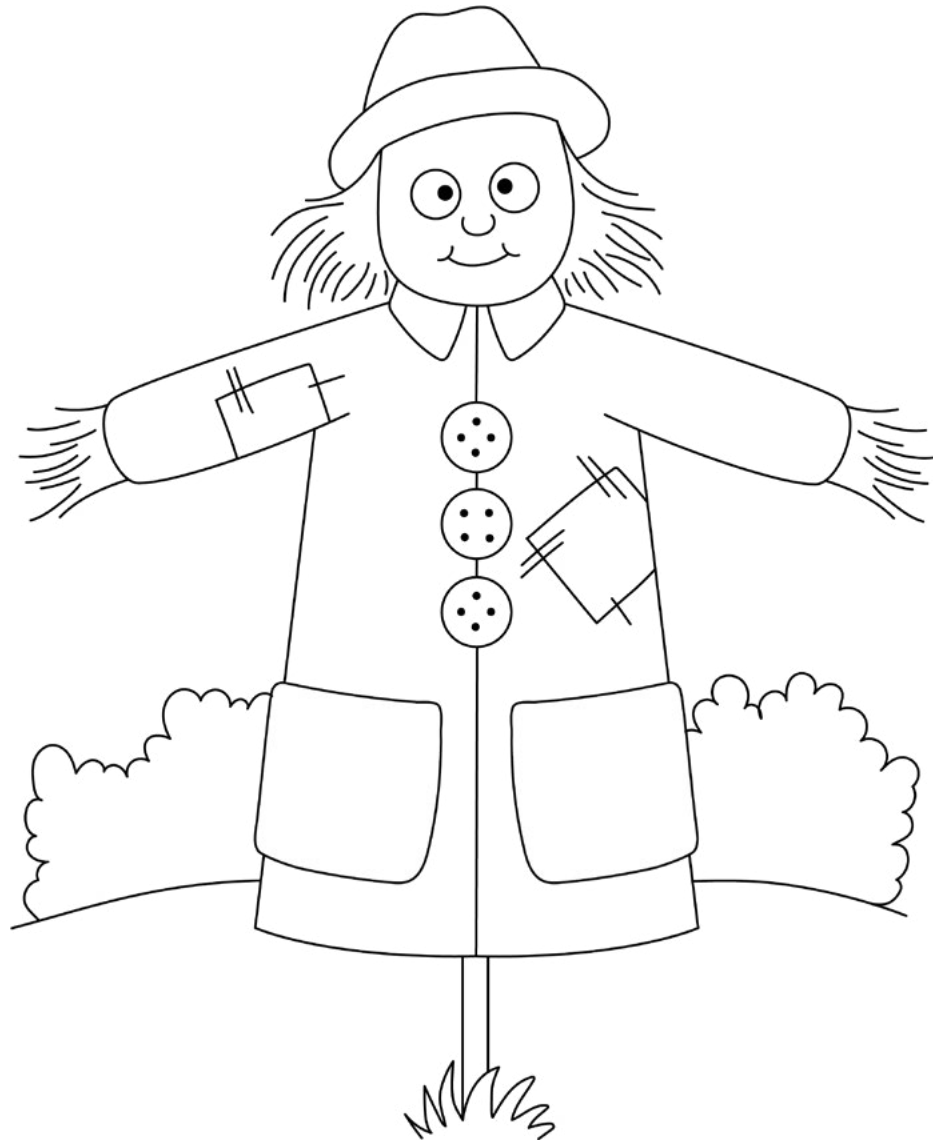

1. What animal is Max?  
Max is a \_\_\_\_\_
2. What colour is Max?  
Max is \_\_\_\_\_
3. How many legs has Max got?  
Max has got  2  3  4 legs.
4. What colour are Max' pants/trousers?  
Max pants/trousers are \_\_\_\_\_
5. What colour is your apple in the bucket?  
The apple is \_\_\_\_\_

*I'm going to feed the hippos, giraffes, rhinos and elephants.*

ANGRY 	TIRE 	EXCITED 

**All about Kenya**  
Read the text about Kenya and fill in the gaps!

Kenya is located in \_\_\_\_\_ and borders the Indian Ocean. The country lies on the \_\_\_\_\_ Kenya's name comes from \_\_\_\_\_ but the word originates probably from the Kikuyu and Kamba languages meaning "God's resting place". There are 42 ethnic groups in Kenya, all with different languages and customs. Kenya has tropical climates along the coast and an arid climate in the highlands. About 50% of the country is used for \_\_\_\_\_ The longest \_\_\_\_\_ in Kenya is the Tana River and the highest \_\_\_\_\_ is Mount Kenya with 5199 metres.

Nairobi, with 4.4 million and Mombasa, with 1.2 million people are the largest cities in Kenya. Kenya has over 50 national parks which are great to \_\_\_\_\_ One of the most popular parks is \_\_\_\_\_ which offers spectacular views of Africa's highest peak Mount Kilimanjaro. It is located in neighbouring Tanzania.

Wildlife in Kenya is abundant. There are many species of mammals and birds. If you go on safari you can see many other \_\_\_\_\_ like lions, elephants, zebras, giraffes, antelopes and monkeys. The \_\_\_\_\_ lion, leopard, rhinoceros, cape buffalo and elephant can be found countrywide in the national parks.

**Life cycle of sea turtles**

Sea turtles are beautiful creatures in the ocean. They are very endangered and their survival is threatened at different stages of their life.

**Nesting and egg laying**  
Female turtles dig holes in beach sands at night and lay between 50-200 eggs in their nests. The nest is then covered with sand and the eggs mature for 60-80 days before babies hatch.

**Hatching**  
Baby turtles usually hatch at night, but some will also come out during the day. They break through their eggshells and dig up through the sand. The babies then race into the water before birds or other animals can catch them.

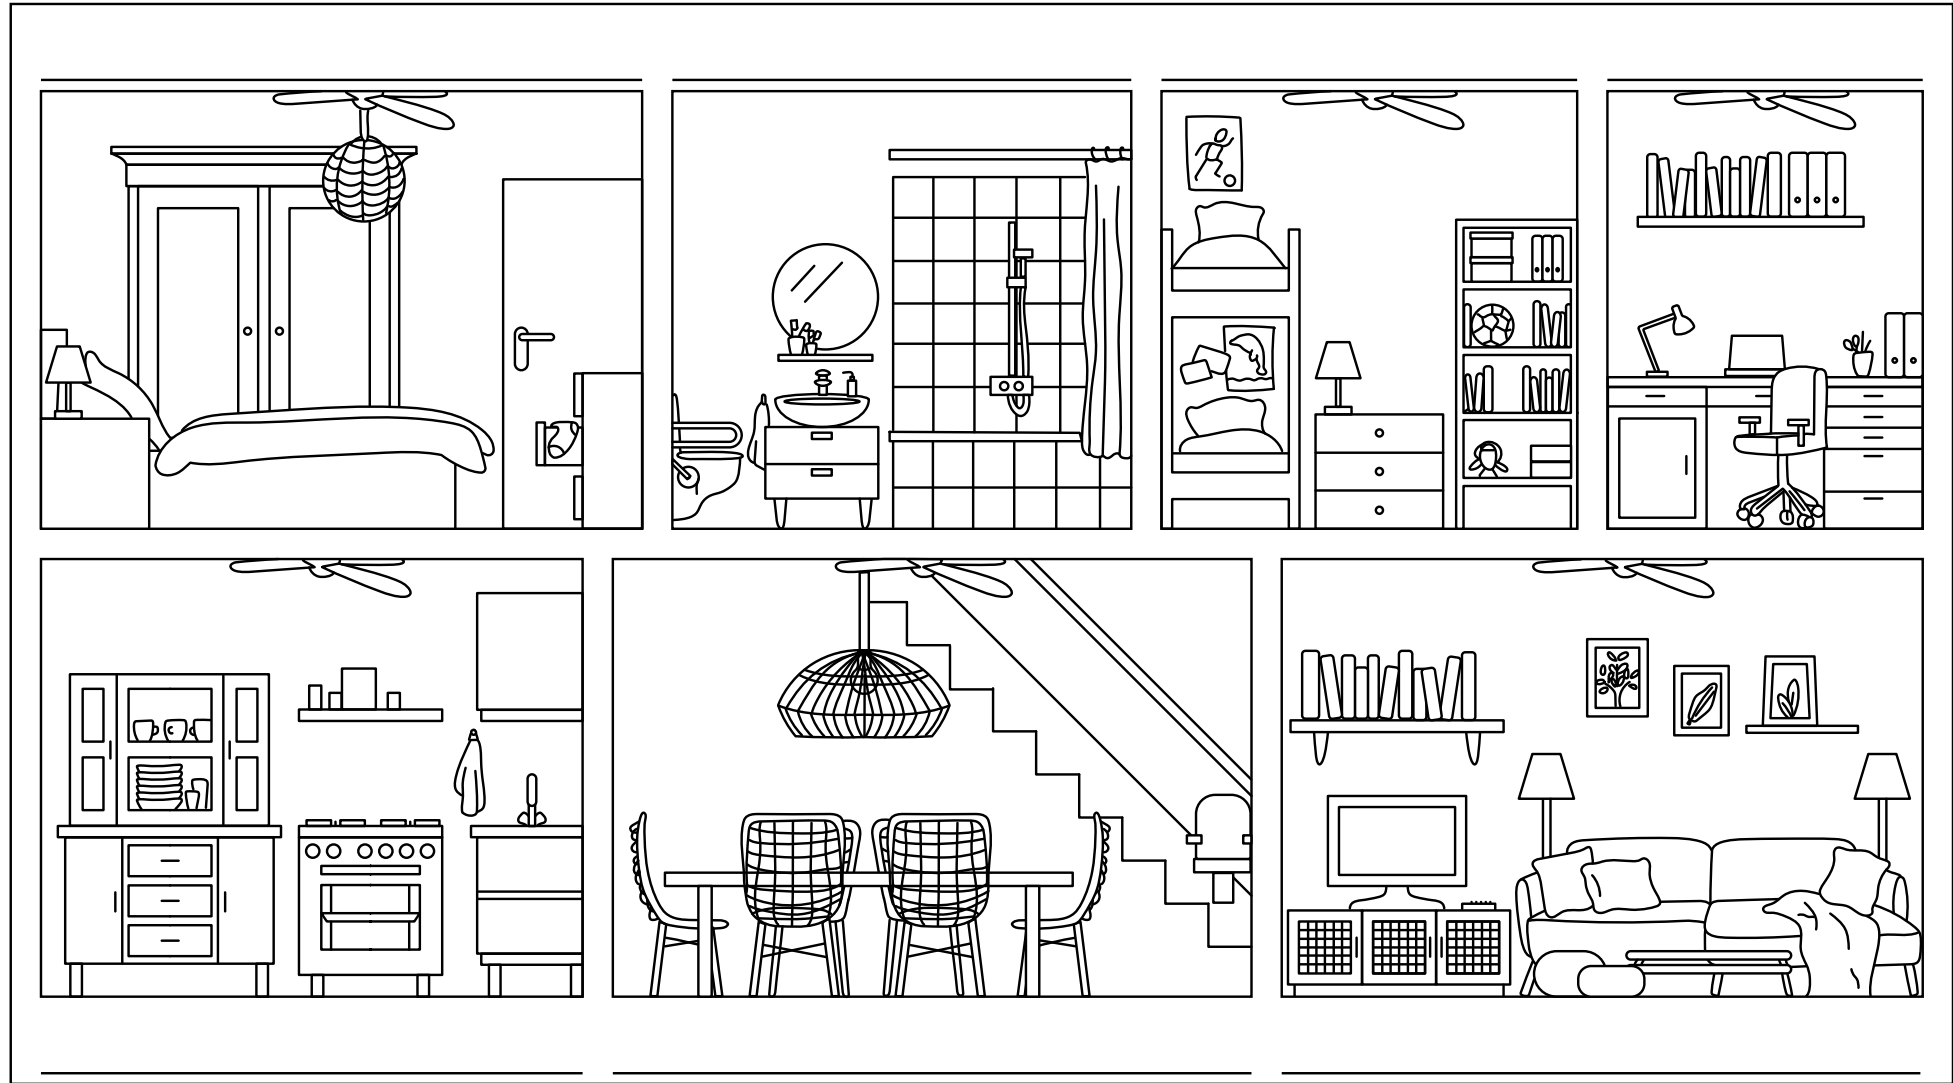

**Juveniles**  
Baby turtles are not strong enough to fight against the powerful ocean currents and are usually swept out to sea. In the open ocean they eat sea grass and plankton for a few years and develop into juveniles.

**Sub-adults**  
Young turtles grow to sub-adult age (not yet able to make babies) and begin to migrate towards shore where they can find more food.

**Adults**  
Adult turtles (able to mate and produce babies) travel to mating areas where they meet other turtles. Females may mate several times during a single season.

Ich bin Nadine, 1990 geboren und in einem kleinen Eifeldörfchen mit vielen geliebten Tieren, Wiesen und Wäldern aufgewachsen. Heute arbeite und lebe ich mit meiner Familie und Kater in Esslingen am Neckar.

In meiner Ausbildung als Maler- und Lackiererin entdeckte ich das konzeptionelle Gestalten für mich, wofür es leider im Alltag als Gesellin nur wenig Raum gab. Also entschied ich mich, Kommunikationsdesign an der Hochschule in Trier zu studieren. Nach meinem Abschluss sammelte ich erste Berufserfahrungen in der Werbebranche und entwickelte nebenher eine immer größer werdende Leidenschaft für die Welt der Kinderbücher und -produkte. Die strahlenden Augen, mit denen meine eigene, kleine Tochter mittlerweile jedes Buch verschlingt, Puzzle zusammensetzt und jedes Spiel auspackt, motivierten mich schließlich, mich nach meiner Elternzeit beruflich voll und ganz der Illustration zu widmen.

Da Tiere und die Natur schon immer ein wichtiger Bestandteil meines Lebens waren, erklärt sich fast von selbst, dass ich heute genau dort einen Großteil meiner Inspirationen finde. Außerdem hält der Familienalltag mit Kleinkind und Kater oftmals die ein oder andere Idee bereit. Besonders gerne erschaffe ich liebevolle Charaktere in einer Welt voller spannender Details, die zum Entdecken einladen. Ich arbeite ausschließlich digital, wodurch Änderungswünsche schnell und problemlos bearbeitbar, und meine Arbeiten vielseitig einsetzbar sind. Trotz digitaler Arbeitsweise achte ich stets darauf, meinen Illustrationen einen natürlichen, handgemachten Charakter zu verleihen.

Wenn Sie auf der Suche nach verspielten, witzigen Illustrationen für die Bereiche Pappe, Bilderbuch, Kinderspiel, oder Beschäftigungs- und Lehrmaterial sind, freue ich mich, von Ihnen zu hören.
